How to Set Up an Email Account on Android (Easy Guide)

Step 1: Download the Outlook App

- If you don't have the Outlook app on your phone, go to Google Play Store.
- Search for Outlook and install the app.

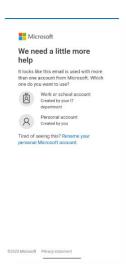

Step 2: Open the Outlook App

- After installation, open the app.
- Type your email address and tap on "Continue".

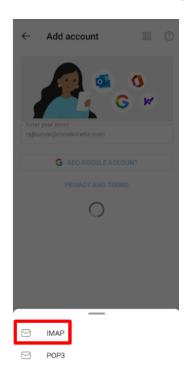

Step 3: Choose Account Type

• Select Work or School as per your need.

Step 4: Choose Email Type

- IMAP (Recommended) Sync emails on multiple devices.
- POP3 Emails are stored only on one device.

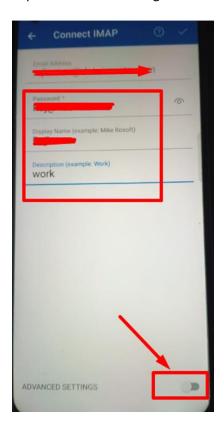

Step 5: Enter Your Email Details

- Password: Type your email password.
- Display Name: Enter your email name.
- Description: Choose Work or School.

• Tap on Advanced Settings.

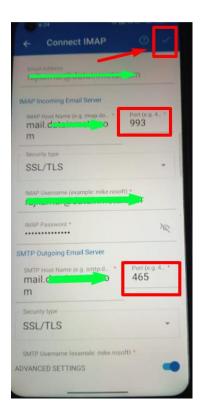

Step 6: Enter Mail Server Details

Incoming Mail (IMAP)

- IMAP Server: mail.yourdomain.com (Example: mail.abc.com)
- Port Number: 993 (With SSL) or 143 (Without SSL)
- IMAP Username: Your email address
- IMAP Password: Your email password

Outgoing Mail (SMTP)

- SMTP Server: mail.yourdomain.com (Example: mail.abc.com)
- Port Number: 465 or 587 (With SSL), 25 (Without SSL)
- SMTP Username: Your email address
- SMTP Password: Your email password

Step 7: Save & Finish

- Tap on the tick mark (**√**) on the top-right corner.
- Your email setup is complete!

Troubleshooting

• If you face issues, try changing the port numbers as mentioned above.

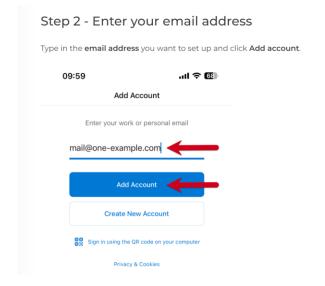

Check if your email and password are correct.

Setting up mail on Outlook app for iPhone

Step 1 - Open the Outlook app Open the Outlook app on your iPhone. 09:58

Note: If you already have an existing email account added to the Outlook app, follow the steps below:

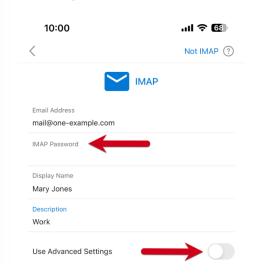

1. Click your profile in the upper left corner.
2. Click the settings icon in the bottom left corner.
3. Click Add Email Account
4. Type in the email address and click Add account.
5. Type in the email password and click Sign In.

Step 3 - Type in your credentials

- 1. Type in the **email password**.
- 2. Click the button Use Advanced Settings.
- 3. Click Sign In.

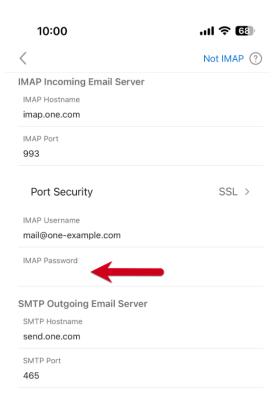

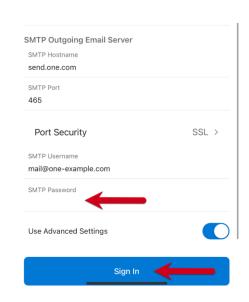

Step 4 - Check your settings

- Now, check your settings, and make sure they are correct and that you type in your email
 password under both the IMAP password and SMTP password.
- 2. Click **Sign In** if the settings are correct.

See the settings below:

- IMAP Incoming Email Server settings:
- IMAP Hostname: imap.one.com
- IMAP Port: 993
- IMAP Username: the email address you're adding.
- IMAP Password: the password for the email address, same as you use when logging in to Webmail.
- Port Security: SSL
- SMTP Outgoing Email Server settings:
- SMTP Hostname: send.one.com
- SMTP Port: 465
- SMTP Username: the email address you're adding.
- SMTP Password: the password for the email address, same as you use when logging in to Webmail.
- Port Security: SSL

Step 5 - Go through privacy settings

Lastly, click through the privacy settings steps to complete the setup.

Your Data, Your Way

We've updated Outlook's privacy settings to let you know what data we collect and how we use it. When you entrust your data to Office, you remain the sole owner of that data.

We collect required diagnostic data to keep your apps secure, up-to-date, and performing as expected on the device it's installed on.

Step 6 - Done!

Congratulations. You've now added the email account to the Outlook app for iPhone.

Note: It can take a few minutes for your emails to download and appear in your inbox.

Outlook Configuration Setup:

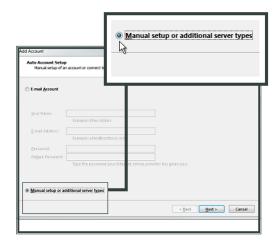

1. Open Outlook and select **File**.

2. Click Add Account.

3. Check Manual setup or additional server types and click Next.

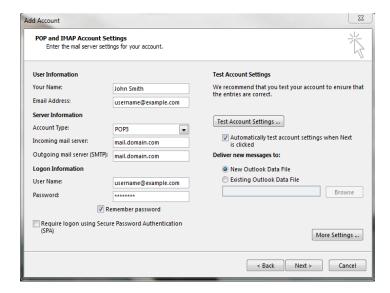

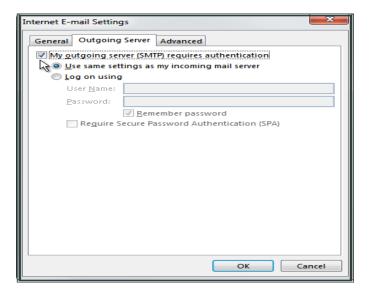

4. Select POP or IMAP and click Next.

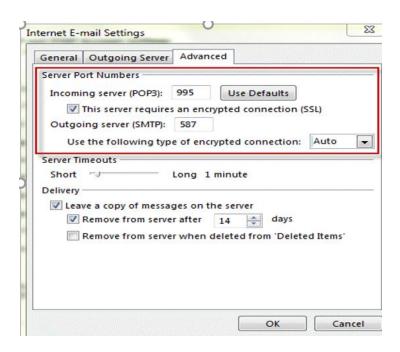

- 5. Enter Your Name and E-mail Address.
- 6. Select **POP3** as your account type.
- 7. For **Incoming mail server**, enter **mail.domainname.com** (exactly as shown here).
- 8. For Outgoing mail server (SMTP), enter mail. domainname.com (exactly as shown here).
- 9. In Logon Information enter the e-mail address and password that we created in the control panel.
- 10. Click More Settings.

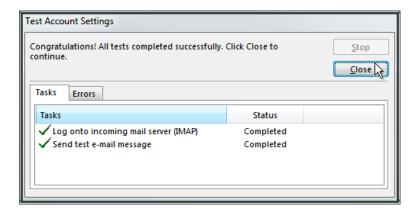

11. Select Outgoing Server and check My outgoing server (SMTP) requires authentication.

- 12. Select Advanced.
- 13. For Incoming server (POP3) enter 995 and select SSL.
- 14. For Outgoing server (SMTP) enter 465 or 587 and select SSL.
- 15. Under **Delivery**, check **Leave a copy of messages on the server** and **Remove from server after 14 days** (it is recommended to not set that higher than 14 days.)
- 16. Click **OK** and then **Next**.

17. Click Close.

18. You have now set up your account in Microsoft Outlook. Click Finish.
